This is Franklin-2, a 1949 Chevrolet Thriftmaster pick-up that is owned by Billy. This little rig has been set up as a "plug buggy" or utility type vehicle. It has a variety of light equipment in the bed including several large flood lights and a generator. This photo was taken shortly before Franklin-2 headed out on the 500 mile journey to Frankenmuth, MI for the SPAAMFAA summer national convention in 2012.
